05 May 2010 Cassandra Anderson | Infowars.com As the federal "Cap and Trade" bill falters in Congress, and resistance to the EPA's 18,000-page new regulation document grows, globalists are trying to bring about expanded control, using the discredited excuse of man made global warming, on a State and local level." Californians, finally realizing the magnitude of the cost of a statewide "Cap and Trade" scheme, in addition to a massive increase in government control, lined up to sign a petition to freeze any action on AB 32 (Cap & Trade scheme voted into law in 2006, to be implemented in 2012). Only 435,000 signatures were needed to get the initiative to suspend AB 32 on the ballot in November, but they got over 800,000 signatures. Thanks to "Climategate" and the numerous other UN science frauds that have been exposed, people are beginning to understand the overall agenda: Agenda 21 Sustainable Development (which uses environmental issues to depopulate and control the masses). This matters to everyone across the country because the Agenda 21 battle is from global to local. It will not stop here, but will continue to be pushed in local governments, in the private sector, schools and local UN programs like ICLEI. Mayors are a major target in local governments. When people become aware of the deceit, it loses its power. Therefore, it is important to understand the game plan behind the Cap & Trade scheme, by looking at the implications of the "AB 32 Scoping Plan": The scoping plan uses scare tactics based on false science; for instance, it warns that California will lose 90% of its snowpack in the Sierras by the end of the century, due to man made global warming (pg 9).
