**By Paul Joseph WATSON**

The multi-billion dollar global warming fraud is truly beginning to crumble, with even vehement man-made climate change advocates like the BBC acknowledging that the credibility of the IPCC is shot.

&ldquo;The bloggers are all over the UN IPCC 2007 report, the bible of global warming, which predicted all manner of dire outcomes for our planet unless we got a grip on rising temperatures &mdash; and it seems to be crumbling in some pretty significant areas,&rdquo; writes the BBC&rsquo;s Andrew Neil in an article entitled &lsquo;The dam is cracking&lsquo;.
